

Of the two values you computed for each player, which do you think best describes the performance of each player? Why?

2. Make a frequency table and histogram for each player. Use the intervals 0-9, 10-19, 20-29, 30-39, 40-49, 50-59, 60-69

3. Describe the shape of the data for all four players. What observations can you make about the four players by looking at the shape?

4. Looking at the histogram for BABE RUTH, determine the range of homeruns Babe Ruth hit while playing for the Yankees.

5. Create a dot plot using Babe Ruth's home runs.

6. Describe the similarities between Babe Ruth's histogram and Babe Ruth's dot plot. Are there any differences? Does the range change between the histogram and the dot plot?

TASK: WHO WAS THE GREATEST YANKEE HOME RUN HITTER?

The following table lists four of the greatest New York Yankees' home run hitters with the number of homeruns each hit while a Yankee.
